Grid bearings are derived from differential dual frequency GNSS observations and are referred to the central meridian of UTM Zone 11.

This plan shows horizontal ground level distances, unless otherwise specified. To compute grid distances, multiply ground level distances by the average combined factor of 0.9998286. The average combined factor has been determined based on an ellipsoidal elevation of 337.0 metres.

The UTM coordinates and estimated absolute accuracy achieved are derived from differential dual frequency GNSS observations post processed using the Natural Resources Canada Precise Point Positioning Service.
